

A white cat with long fur is looking down and to the right. The background is dark with two glowing spherical objects that look like futuristic lights or sensors.

Welcome. This list of cat names is meant to entice you to think about unusual names, enticing you to the perfect name whether it is on this list or not.

Why 873? Because that's how many made the list. We will add to it at some point.

-  If you are drawn to a name but don't know the meaning, Google it. The meaning (if there is one) is likely to pop right up.
-  If you like the name but it is under a heading that doesn't suit your cats ' look or sex, we say go ahead. After all many people have named their cat Pickles, but we have yet to see a green cat.
-  See a name, but don't like the spelling? Change it. Just do it. After all the cat is yours and so (or soon will be) is the name.
-  Most important, let your creative juices flow and have fun.
